

# Power Roof Vents

## Cool Attic® Power Vents

- Rugged and efficient domes
- Motors built to last
- Adjustable thermostats
- Proven and reliable construction

Our low profile domes—available in Duradome® Spun Aluminum or Galvanized Steel—have galvanized steel mesh grilles to protect against insects, birds, and rodents yet allow adequate air intake. Our fan blades are precision balanced for minimum vibration. Our motors are UL and CU/L listed for safety in handling. Cool Attic® Power Roof Vents are factory assembled for easy installation (no special tools required) and are built for stability and high wind resistance.
